

Amendment After Final Office Action

b) providing a first graphical user interface having a list of instructional topics associated with the medical device to the user computer in response to the request;

c) providing a second graphical user interface having a list of instructional sub-topics associated with an item on the list of instructional topics to the user computer in response to receiving a request for the item on the list of instructional topics from the user computer;

d) providing a plurality of instructional graphical user interfaces having instructional information pertaining to an item on the list of instructional sub-topics to the user computer in response to receiving a request for the item on the list of the instructional sub-topics from the user computer; and

e) generating a feedback indicating (i) whether a particular interaction is appropriate under given conditions; and (ii) the correctness on the use of the medical device.

14. (Twice Amended) A system for providing instructional information on the use of a medical device, the system comprising:

a) a network;

b) a user computer coupled to the network for requesting instructional information on the use of the medical device; and

c) a server coupled to the network;

wherein the server provides a first graphical user interface having a list of instructional topics associated with the medical device to the user computer in response to the request for instruction, provides a second graphical user interface having a list of

Amendment After Final Office Action

32 instructional sub-topics associated with an item on the list of instructional topics to the user computer in response to receiving a request for the item on the list of instructional topics from the user computer, provides a plurality of instructional graphical user interfaces having instructional information pertaining to an item on the list of instructional sub-topics from the user computer, and generates a feedback indicating (i) whether a particular interaction is appropriate under given conditions; and (ii) the correctness on the use of the medical device.

26. (Twice Amended) A computer program article of manufacture, comprising:

a) a computer-readable medium for providing instructional information on the use of a medical device;

b) executable instructions in the computer-readable medium for receiving a request for instructional information on the use of the medical device over a network, the request originating from a user computer;

33 c) executable instructions in the computer-readable medium for providing a first graphical user interface having a list of instructional topics associated with the medical device to the user computer in response to the request;

d) executable instructions in the computer-readable medium for providing a second graphical user interface having a list of instructional sub-topics associated with an item on the list of instructional topics to the user computer in response to receiving a request for the item on the list of instructional topics from the user computer;

e) executable instructions in the computer-readable medium for providing a plurality of instructional graphical user interfaces having instructional information pertaining to an item on the list of instructional sub-topics to the user computer in

Amendment After Final Office Action

response to receiving a request for the item on the list of the instructional sub-topics from the user computer; and

f) executable instructions in the computer-readable medium for generating a feedback indicating (i) whether a particular interaction is appropriate under given conditions; and (ii) the correctness on the use of the medical device.

27. (Twice Amended) A business method for providing instructional information on the use of a medical device to a customer computer, the method comprising:

a) receiving a request for instructional information on the use of the medical device over a network, the request originating from the customer computer;

33 b) providing a first graphical user interface having a list of instructional topics associated with the medical device to the customer computer in response to the request;

c) providing a second graphical user interface having a list of instructional sub-topics associated with an item on the list of instructional topics to the customer computer in response to receiving a request for the item on the list of instructional topics from the customer computer;

d) providing a plurality of instructional graphical user interfaces having instructional information pertaining to an item on the list of instructional sub-topics to the customer computer in response to receiving a request for the item on the list of the instructional sub-topics from the customer computer; and

e) generating a feedback indicating (i) whether a particular interaction is appropriate under given conditions; and (ii) the correctness on the use of the medical
